INVESTMENT OBJECTIVE AND STRATEGY

The UnionBank Philippine Peso Fixed Income Portfolio is a peso-denominated bond fund designed to provide investors higher returns than traditional fixed-income savings products.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Philippine Peso Fixed Income Portfolio is suitable only for investors who:
 - Are individuals of legal age and corporations with a medium to long-term investment horizon
 - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

<ul style="list-style-type: none"> ❖ THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC) ❖ RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY ❖ WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT ❖ THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE

The Fund has no outstanding investment in the issuances of companies related to UnionBank of the Philippines.

OUTLOOK AND STRATEGY

Philippine GDP printed slightly lower than expected at 5.6% vs. 5.7% consensus estimates despite stronger government spending in June. An increase in consumption and investment offset a slowdown in exports.

Bangko Sentral ng Pilipinas kept its overnight borrowing rate on hold at 4% in its meeting last August 13. The decision was widely expected as policy makers remain comfortably on hold noting that inflation will likely be below the target range for 2015. The central bank's reaction towards development in the global front is said to remain consistent with their macro prudential measures.

Yields for the local bonds were lower for the month of August. With the sub 1% inflation and the yields tracking US treasuries, local bond players continued to be comfortable at near the highs for the year with 10 year yields reaching 3.5% levels and the long end of the curve reaching below 4%. Market players also remained biddish for the month as they await details of Bureau of Treasury's debt swap to be exchanged first week of September.
