INVESTMENT OBJECTIVE AND STRATEGY

The UnionBank Philippine Peso Fixed Income Portfolio is a peso-denominated bond fund designed to provide investors higher returns than traditional fixed-income savings products.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Philippine Peso Fixed Income Portfolio is suitable only for investors who:
 - Are individuals of legal age and corporations with a medium to long-term investment horizon
 - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

OTHER DISCLOSURES
RELATED PARTY TRANSACTIONS

The fund has bond investments with Aboitiz Equity Ventures and time deposits with City Savings Bank amounting to Php 39.16 Mn and Php 150.32 Mn, respectively. These investment outlets were approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

Third quarter borrowing schedule was released, which detailed offers of a total of PHP 75- billion in 7-year and 10-year treasury bonds. Re issuance of FXTN 07-58 was oversubscribed as demand reached PHP 44.728. Auction was 1.789x with its auction size of PHP 25 B. Average rate was awarded below its coupon rate at an average of 3.016%. BSP's Term Deposit Auction (TDF) still maintained at 2.50%. Steady increase in auction size of the TDF is to be expected in the coming months.

Inflation for June surged to 1.9% from 1.6% in May which was primarily brought by higher in food and non-alcoholic beverage prices. This falls within the 1.5%-2.4% estimate of monetary governing authorities. Rates have been steady for 14 consecutive Monetary Board meetings, since October 2014. As local bond fundamentals remain favourable, yields eased further south. Long term bonds were the most sought after as the GS yield curve bull flattened further. However, we expect US benchmark yields to still play a role in the direction of local bond yields.
