**INVESTMENT OBJECTIVE AND STRATEGY**

The UnionBank Philippine Peso Fixed Income Portfolio is a peso-denominated bond fund designed to provide investors higher returns than traditional fixed-income savings products.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Philippine Peso Fixed Income Portfolio is suitable only for investors who:
  - Are individuals of legal age and corporations with a medium to long-term investment horizon
  - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

## OTHER DISCLOSURES

### RELATED PARTY TRANSACTIONS

The fund has bond investments with Aboitiz Equity Ventures and time deposits with City Savings Bank and UnionBank of the Philippines amounting to Php 53.38 Mn, Php 38.36 Mn and Php 6.64 Mn, respectively. These investment outlets were approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

### OUTLOOK AND STRATEGY

Philippine CPI printed at 3.1% in May of 2017, following a 3.4 percent rise in April. This was below market expectations of 3.3% as food and transport rose at a slower pace.

Bangko Sentral ng Pilipinas kept its overnight borrowing rate at 3% in its June monetary board meeting as widely expected. The Monetary Board stated that the inflation environment continues to be manageable and kept its inflation forecasts for 2017-2019 unchanged at 3.0 percent  $\pm$  1 percentage point but said upside risks persist.

The local bond market continued to take its cue from external developments. Local yields saw a relief rally during the first half of the month with Yields from the belly and the long end dropping almost 20bps across the liquid benchmarks until until ECB and BOE surprised markets by perceived hawkish policy direction statements. Local Market was quick to react as local bond yields rose and erased gains. We remain defensive and cautious preferring the short dated tenors for now.
