INVESTMENT OBJECTIVE AND STRATEGY

The UnionBank Philippine Peso Fixed Income Portfolio is a peso-denominated bond fund designed to provide investors higher returns than traditional fixed-income savings products.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Philippine Peso Fixed Income Portfolio is suitable only for investors who:
 - Are individuals of legal age and corporations with a medium to long-term investment horizon
 - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

RELATED PARTY TRANSACTIONS

The fund has bond investments with Aboitiz Equity Ventures and time deposits with City Savings Bank and Unionbank of the Philippines amounting to Php 61.71 Mn, Php and Php 125.07 Mn and 6.51 Mn, respectively. These investment outlets were approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

Philippine September inflation printed at 3.4% vs. median estimates of 3.2%. Core inflation went up 3.3% yoy vs. 3.1% yoy with upward pressure that came from higher utilities prices and worse-than expected impact from typhoons. The central bank however is still optimistic about inflation environment will continue to be manageable over the policy horizon and the levels remain within expectations.

BTR was successful in their bond re issuance of FXTN 5-74 reaching almost 2x its scheduled 15B offer. Accepted yields averaged 3.979%.

Despite the upward pressure on yields due to developments abroad, the local bond market put liquidity to work which was shown through highly oversubscribed T-bill auctions. Economic data released showed M3 up by 15.4% yoy and bank lending net of RRP up by 20.4% yoy. Yields on the short end of the curve remained strong however yields on the belly and the long end of the curve saw mostly sellers. Real money users preferred t-bills and 3 years below as faster normalization of interest rates abroad are being priced in.
