\*As a percentage of the total market value of the fund for the month valued at Php 949.38 Mn

**INVESTMENT OBJECTIVE AND STRATEGY**

The UnionBank Philippine Peso Fixed Income Portfolio is a peso-denominated bond fund designed to provide investors higher returns than traditional fixed-income savings products.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Philippine Peso Fixed Income Portfolio is suitable only for investors who:
  - Are individuals of legal age and corporations with a medium to long-term investment horizon
  - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

- ❖ **THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)**
- ❖ **RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY**

## OTHER DISCLOSURES

### RELATED PARTY TRANSACTIONS

The fund has bond investments with Aboitiz Equity Ventures and time deposits with City Savings Bank and Unionbank of the Philippines amounting to Php 59.72 Mn, Php 27.12 Mn, and Php 16.56 Mn, respectively. These investment outlets were approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

### OUTLOOK AND STRATEGY

Q1 2018 GDP growth was released this month, reaching 6.8%, slightly outside the government's full-year target of 7-8%, but higher than the 6.5% growth of 4Q 2017. Other notable indicators released this month was, April CPI which printed at 4.50% versus the 4.30% gain the previous month and Government Spending data which reached ₱261BN for the month, up 43% year-on-year. According to the Department of Budget and Management, this was mainly driven by infrastructure spending which almost doubled from 33.5BN in April 2017 to 65.6BN in April 2018.

Following the release of the said data, the Philippine Central Bank (BSP) cuts reserve requirement ratio (RRR) by 1pp from 19% to 18%. Governor Espenilla flags more RRR cuts, aiming to gradually bring it below double digits. Meanwhile, the BSP finally increased key policy rates by 25 basis points this month to 3.25%. The hike was viewed to ease investor concerns that BSP is falling behind the curve. As a result, yields initially went down as much as 20bps across the curve.

On the local bond market front, PHP bond yield curve bull steepened as treasury bills continue to be the market favorites. Sizable bid volumes are seen in the 91-day and the 182-day Treasury Bill auctions with around 2x bid-to-cover. Meanwhile, on the long end of the curve, it seemed support is still evident with yields maintained at previous levels. Total trading volume increased to ₱ 189.2 BN versus ₱ 130.2 BN the previous month.

In other news, the Bureau of Treasury announced the issuance of a new 3-year retail treasury bond (RTB), with an initial auction size of ₱ 30 BN. The Dutch auction attracted ₱ 92.8 BN bids which is around 3x bid-to-cover. BTr awarded the auction with a coupon of 4.875% and volume amounting to ₱ 66 BN. We continue to remain cautious in anticipation of further developments on local inflation, debt supply, geopolitical matters and global oil supply concerns.
