INVESTMENT OBJECTIVE AND STRATEGY

The UnionBank Dollar Bond Portfolio is a US Dollar-denominated bond fund designed to provide investors with higher returns than traditional fixed-income savings products. Earnings volatility is kept at moderate levels, through disciplined investment selection and tenor diversification.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Dollar Bond Portfolio is suitable only for investors who:
 - Are individuals of legal age and corporations with a medium to long-term investment horizon
 - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

❖ THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)
❖ RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY

The fund has time deposits with UnionBank of the Philippines amounting to USD 1.55 Mn. This investment outlet was approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

The minutes of the FOMC meeting in January was released and shows caution on policy normalization although they have acknowledged improving economic data. While they have considered concerns on recent global events, they did not put rate hikes off the table this year. Fed speak in February did not provide much guidance either as statements and views differ. USTs rallied immediately after Japan implemented a negative interest policy in January with the yield on the 2s down by 2 bps to 0.7737%, the 10s down by 20 bps to 1.7347% and 30y down by 14 bps to 2.6156%. ROPs traded sideways in February after a strong performance in January, with the 10yr benchmark closing the month higher by only 25 bps from end-January, with a yield of 2.93%. The government also issued a new 30y benchmark, the 41s at an issue price of 100 and a yield of 3.7%. This bond was issue with a premium of 20 bps to the previous benchmark, but immediately caught up to end the month at 3.56%. The same concerns continue to dominate the USD bond market: global economic growth concerns that resulted to a number of central banks adopting unconventional monetary policies, oil prices, and credit deterioration.
