**INVESTMENT OBJECTIVE AND STRATEGY**

The UnionBank Dollar Bond Portfolio is a US Dollar-denominated bond fund designed to provide investors with higher returns than traditional fixed-income savings products. Earnings volatility is kept at moderate levels, through disciplined investment selection and tenor diversification.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Dollar Bond Portfolio is suitable only for investors who:
  - Are individuals of legal age and corporations with a medium to long-term investment horizon
  - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

<b>Weighted Ave. Duration</b>	2.2742
<b>Volatility, Past 1 Year*</b>	1.23%
<b>Shape Ratio**</b>	2.83%
<b>Information Ratio***</b>	-0.37

\*Volatility measures the degree to which the Fund fluctuates vis-a-vis its average return over a period of time.

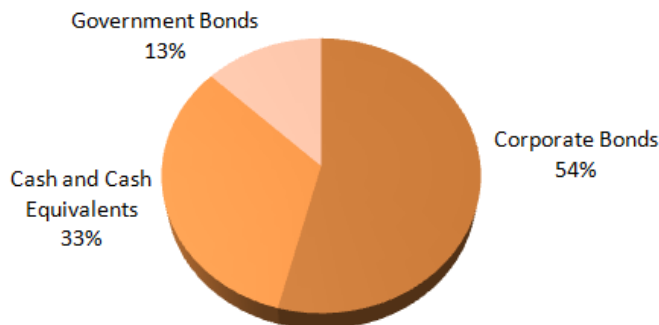

\*\*Sharpe Ratio is used to characterize how well the return of Fund compensates the investor for the level of risk taken. The higher the number, the better. (Risk Free Rate = 0.1833%)

\*\*\*Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

**Portfolio Composition**

**OTHER DISCLOSURES**

**RELATED PARTY TRANSACTIONS**

The fund has time deposits with UnionBank of the Philippines amounting to USD 1.53 Mn. This investment outlet was approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

**OUTLOOK AND STRATEGY**

The month of March was mainly driven by the comments of the FED Chair Janet Yellen, in a speech to the Economic club of New York. She maintained her dovish tone saying that it is appropriate for the Central Bank to proceed with caution in raising interest rates citing concerns on external development, mainly oil prices and China, as the key risks to the downside. She did not mention anything about negative rates but she said that going near zero rate is possible if necessary. The comments were interpreted as "ultra" dovish by the market and spurred a rally on emerging market bonds. ROP's benefited mostly as prices rallied on the back of US treasury movements. ROP 2041's rallied from 102 levels to reaching all time highs of 105.75. ROP 2040's also rallied to 109 from 107 post FED comments. We expect ROP's to further track global developments especially movements in benchmark US treasuries.
