INVESTMENT OBJECTIVE AND STRATEGY

The UnionBank Dollar Bond Portfolio is a US Dollar-denominated bond fund designed to provide investors with higher returns than traditional fixed-income savings products. Earnings volatility is kept at moderate levels, through disciplined investment selection and tenor diversification.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Dollar Bond Portfolio is suitable only for investors who:
 - Are individuals of legal age and corporations with a medium to long-term investment horizon
 - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

❖ THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)
❖ RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY
❖ WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT

Lowest	2.049154

Statistics

Weighted Ave. Duration	2.5007
Volatility, Past 1 Year*	2.64%
Sharpe Ratio**	-0.50
Information Ratio***	-0.34

*Volatility measures the degree to which the Fund fluctuates vis-a-vis its average return over a period of time.

**Sharpe Ratio is used to characterize how well the return of Fund compensates the investor for the level of risk taken. The higher the number, the better. (Risk Free Rate = 0.4070%)

***Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

PORTFOLIO COMPOSITION

OTHER DISCLOSURES

RELATED PARTY TRANSACTIONS

The fund has time deposits with UnionBank of the Philippines amounting to USD 704,824.72. This investment outlet was approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

PHP. Philippine CPI rose 2.8% for the month of July. Inflation reading was in line with market expectations following the revised CPI reading last June at 2.7%.

BTR re-issued FXTN 05-74 with total bids reaching PHP 21.1B. The 5 yr re issue has successfully filled the PHP 15B scheduled borrowing with an average rate of 4.226%. On the other hand, FXTN 20-21 re-issuance was fully rejected with bids only amounting to PHP 11.2B. Bids reached as high as 5.5% and a low of 5.10% which averaged 5.2445%.

Local bond market yields still continue to take its cue from US Treasury benchmark bonds. As US treasuries eased from month highs of 2.38% to 2.23%, local government securities followed suit as yields on the short end eased. Demand for the short dated tenor bonds were also boosted by the lack of issuance of short dated bonds in the 3rd quarter. With local inflation outlook still benign and market consensus of a steady monetary policy at least for the 3rd quarter, we expect yields to stay within range as we enter the ghost month.

USD. The Federal Reserve left interest rates unchanged at 1% to 1.25% last month. The Fed came out generally more dovish compared to last month's meeting by acknowledging inflation concerns by the statement: "running below 2%" from "somewhat below 2%". Talks of Balance sheet reduction was expected to be announced by September. Market quickly reacted with 10 Year US treasuries rallying and reversing losses falling to below 2.30%. Meanwhile, doubts on whether Trump can deliver on Tax reforms and higher infrastructure spending also added to strong demand for US treasury benchmark bonds.

ROP prices recovered from last month losses, as players emerged better buyers. Long dated ROP 42 ended 175 pips higher or 11 basis points lower in yield terms. ROP space continued to follow US treasury movement as spreads further tightened for the month. We continue to stay light and defensive as external developments unfold especially as the Federal Reserve remain data dependent.
