INVESTMENT OBJECTIVE AND STRATEGY

The UnionBank Dollar Bond Portfolio is a US Dollar-denominated bond fund designed to provide investors with higher returns than traditional fixed-income savings products. Earnings volatility is kept at moderate levels, through disciplined investment selection and tenor diversification.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Dollar Bond Portfolio is suitable only for investors who:
 - Are individuals of legal age and corporations with a medium to long-term investment horizon
 - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

❖ THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)
❖ RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY
❖ WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT

*Volatility measures the degree to which the Fund fluctuates vis-a-vis its average return over a period of time.

**Sharpe Ratio is used to characterize how well the return of Fund compensates the investor for the level of risk taken. The higher the number, the better. (Risk Free Rate = 0.8420%)

***Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

PORTFOLIO COMPOSITION

OTHER DISCLOSURES

RELATED PARTY TRANSACTIONS

The fund has time deposits with UnionBank of the Philippines amounting to USD 452,039.78. This investment outlet was approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

US GDP was adjusted to 2.90% from 2.50% against the expected 2.70% in the final quarter of 2017. The economy grew 2.30% full year as compared to its GDP in 2016 at 1.50%.

10 year UST breached the psychological 3% mark, reaching a high of 3.035% from previous month high of 2.914%. While various geopolitical concerns such as the trade tensions with China are ongoing, the breach was partially felt to be demand-driven. The UST yield curve remained somehow flat with short term rates inching up faster than the long term rates. UST2Y ended the month at 2.49% up 22bps from previous month's closing of 2.27% while the longer term UST 30Y ended the month at 3.11% up 14bps from previous month's 2.97%.

The FED's pace concerning normalization is still communicated to be data driven. Economic Indicators remain on the lookout with Consumer Price Index (CPI) mounting to 0.2% for this month as opposed to 0.1% of the previous month. Similarly, closely monitored inflation measure Core Personal Consumption Expenditure (PCE) Price Index, posted an increase of 0.19% in March (1.9% yoy), in line with consensus, the highest since February last year.

While the Fed increased its key rates by 25bps last March, market is pricing another 25bp hike on the June meeting with the Bloomberg World Interest Rate Probability (WIRP) at c72%. On the local front, ROP 42s dipped 3% this month from 96.317 to a low of 92.375 and ended at 93.325. ROP 42 underperformed with a total month end return of -2.76% against its emerging market counterpart Indon 42 with -1.21% total month end return. We continue to remain cautious and defensive as we wait for data outcomes and further global developments.
