INVESTMENT OBJECTIVE AND STRATEGY

The UnionBank Dollar Bond Portfolio is a US Dollar-denominated bond fund designed to provide investors with higher returns than traditional fixed-income savings products. Earnings volatility is kept at moderate levels, through disciplined investment selection and tenor diversification.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Dollar Bond Portfolio is suitable only for investors who:
 - Are individuals of legal age and corporations with a medium to long-term investment horizon
 - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

PORTFOLIO COMPOSITION

OTHER DISCLOSURES
RELATED PARTY TRANSACTIONS

The fund has time deposits with UnionBank of the Philippines amounting to USD 807,779.58. This investment outlet was approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

US Treasuries yields rallied 9-11 bps in the 5 - 20 year space on safe haven demand due to trade tensions and EM routes. This caused the UST yield curve to flatten in August. ROP prices tracked UST movement as we saw players adjusting/trending offers higher as we saw profit takers making most of the opportunity. However, we saw tepid demand for the ROP with only a handful of trades mostly coming from liquid series. Most investors stayed on the sidelines while waiting for fresh leads on the upcoming issuance of ROP towards the end of the year. BTr is eyeing another borrowing of up to \$1.5B this year to prefund maturities of around \$1.518B next year. It is worth noting that BTr already issued \$2B (\$750M new money) of ROP 28 earlier this year.

We remain cautious on further details and developments on this new issuance as this will add supply pressure in the market.
