Risk Characteristics:

One day VAR at 3σ:	0.59%
Volatility, Past 360 Days:	3.70%
Duration:	3.51
Sharpe Ratio (Risk Free Rate = 0.273%):	1.97

Volatility is a measure of fluctuation of the NAVpu. Higher volatility means higher potential for gains or losses. Duration measures the sensitivity of the portfolio to interest rate movements. The higher the duration, the more the NAVpu will change with interest rate fluctuation. The Sharpe Ratio is a measure of risk-adjusted return. The higher the Sharpe, the higher the return per unit of risk. Risk-free rate used to compute the Sharpe ratio is the 1yr US TBill rate.

This document is for information purposes only and does not constitute an offer or a solicitation to buy or sell any investment referred to in this document. All Unit Investment Trust Funds (UITFs) are regulated by the Bangko Sentral ng Pilipinas. The UITF is not a deposit and is not insured by PDIC. Due to the nature of the investments, yield and potential yields cannot be guaranteed. Any income or loss arising from market fluctuations and price volatility of the securities held by the UITF, even if invested in government securities, is for the account of the investor. As such, units of participation of the investor in the UITF, when redeemed, may be worth more or be worth less than his/her initial investment/contributions. Historical performance, when presented, is purely for reference purposes and is not a guarantee of future results. The Trustee is not liable for losses, unless upon willful default, bad faith or gross negligence.

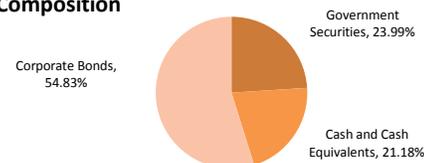

Fund Manager's Report

Risk aversion, coupled with the Fed's efforts to lower borrowing rates, heightened the demand for safe haven securities. The Federal Reserve of the United States kept its rate unchanged despite higher jobless claims, but remained dovish and supportive of the US economic growth. Initial jobless claims increased to 380,000 from 357,000 last month. This pushed the benchmark 10-year treasury yield down by 27 basis points from 2.182 percent to 1.915 percent.

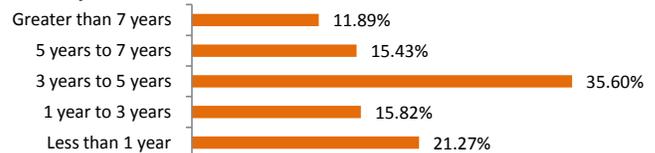

The news in Europe was also not encouraging as Spain experienced a double-dip recession. The Spanish economy contracted by 0.4 percent year-on-year on the back of deeper budget cuts by the Spanish Government aimed to meet the nation's commitments to the European Union. Uncertainty over Europe's political climate caused the 10-year French and Italian bond yields to jump at an average of 50 basis points at 2.961 percent and 5.512 percent, respectively.

Despite global economic uncertainties, the Philippine economy still remains bullish. Benign inflation, at a lower than expected 2.6 percent, kept the Bangko Sentral ng Pilipinas (BSP) from easing its policy rates further. The government has ramped up its fiscal spending by 15 percent, while striving to keep the budget deficit at 2.6 percent of GDP. The good economic sentiment increased the demand for dollar-denominated sovereign debt, pushing yields down by an average of 12 basis points for the shorter maturities and 6 basis points on the longer maturities.

FOOTNOTES:

¹FUND VALUATION

The Dual Pricing Method shall be used in computing the Net Asset Value (NAV) of the fund. Under this method, the **Bid Net Asset Value per Unit (Bid NAVpu)** and the **Offer Net Asset Value per Unit (Offer NAVpu)** shall be calculated.

The **Bid NAVpu** is the redemption price. It is the price used when a client wishes to redeem units from the fund. The Bid NAVpu is calculated using the closing bid prices of the underlying assets of the fund for the day, net of fees and other allowable expenses.

The **Offer NAVpu** is the admission price. It is the price used when a client wishes to contribute to the fund. The Offer NAVpu is calculated using the closing offer prices of the fund's underlying assets for the day, net of fees and other allowable expenses.

The **Mid/Last Net Asset Value per Unit (Mid/Last NAVpu)** shall also be computed for information or reporting purposes only. For client reporting, the Bid/Offer values shall be provided in the financial statement footnotes.

i. The Mid NAVpu shall be computed for UITFs with fixed income assets. It shall be determined from the average of the bid-side and offer-side market yields-to-maturity or prices of the underlying assets of the fund for the day, net of fees and other allowable expenses.

ii. The Last NAVpu shall be computed for all UITFs with equity holdings. It shall be determined from the LAST closing prices of outstanding equity holdings for the day, net of fees and other allowable expenses.

²PROSPECTIVE INVESTMENTS

The Fund may be invested and reinvested in:

- i. Securities issued by or guaranteed by the Philippine government, or the Bangko Sentral ng Pilipinas;
- ii. Exchange-listed securities;
- iii. Marketable instruments that are traded in an organized exchange;
- iv. Loans traded in an organized market;
- v. Savings/Checking accounts and/or time deposits in any bank or financial institution, including UnionBank of the Philippines;
- vi. Derivative instruments for the purpose of hedging market risk exposures.
- vii. Such other tradable investment outlets/ categories as the BSP may allow.

A complete list of holdings is available upon request.

³FEES & EXPENSES

The Trustee shall collect from the Fund trust fees in the amount of THREE-QUARTERS PERCENT (0.75%) per annum based on the Gross Market Value of the Fund which shall be accrued daily and shall be collectible from the Fund at the end of every calendar month.

The Trustee may charge the Fund for special expenses if the same is necessary to preserve or enhance the value of the Fund. Such special expenses shall be payable to pertinent third party or parties covered by separate contract/s, and disclosed to the Participants.

An investor should read the complete details of the fund in the Plan Rules, and should carefully consider the fund's investment objectives, risks, charges and expenses. He then should make his own risk assessment and, when necessary, seek independent/professional opinion before making an investment.
