Fund Manager's Report

News in December focused on the apparent impasse between Republicans and Democrats over the 'fiscal cliff' negotiations. An eleventh-hour compromise was reached on New Year's Day, which temporarily soothed the markets. The compromise bill raised taxes on the wealthiest 2% of Americans, while preventing a tax hike on the middle classes. However, the contentious issue of spending cuts was deferred for two months, thus setting the stage for another bruising battle that could induce another round of volatility in the US and global markets.

Philippine US-dollar denominated sovereign debt (ROPs) took a breather last December. With the holiday season kicking in, the market was relatively subdued while tracking the rates of risk-free US Treasury bonds. Trading volume was thinner, while the market became a bit defensive as some market players took profit before the year ended. US Treasuries traded down along the medium-term tenors, pushing ROP bond yields by 6 to 12 basis points. Over the long-end tenors, ROPs slightly traded down. Losses were pared mainly due to the optimism over the fiscal cliff resolution.
