US Treasury yields unexpectedly rose on better than expected economic data from the US. The US economic data showed improving unemployment and retail sales figures thus prompting the benchmark US Treasury yields to rise its highest level in more than two months. The 10 year Treasury rose to 1.97% while the 30 year Treasury rose to 3.1%. US GDP for the first quarter of 2013 was reported at 2.5% while unemployment was better at 7.5%.

In the latest meeting, the Federal Reserve (FED) still kept interest rates at all-time lows however commented that they will stand ready to further evaluate and adjust its existing \$85 Billion/month bond buying program when appropriate. Market is speculating that given traction in economic recovery; the FED might lessen if not abruptly stop the current pace of its existing monetary easing policy within the year.

Philippine Dollar-denominated Sovereign Debt (ROPs) yields steepened the most in recent months with yields rising mostly in belly towards the long end of the curve by around 10–12bps. Moving forward, we an upward bias in ROP yields due to the rise in US Treasury yields. Market is expecting US Treasuries to continue to test higher yield levels due to speculation on the further release of better US economic data.
