#### Fund Manager's Report

US Treasury curve flattened in July with the long end falling by as much as 20bps. The decrease in yields was due to geopolitical tensions in Russia and the Middle East and several interest rate cuts made by the ECB in recent months making the UST yields more attractive than other bonds of developed nations.

This move supported the latest pronouncements by FED chair Yellen that the US economy is experiencing modest to moderate growth. Nevertheless, she reiterated that there is still slack in labor market and that significant improvement is still yet to be seen. Additionally, there is still an ongoing debate on when the FED will increase benchmark rates. Expectation is that rates will be increase by mid-2015.

In ROPs, Philippine dollar sovereign debt continued to track USTs. The short end of the curve rose by an average of 20-40bps and the long end falling by 20bps.
