Fund Manager's Report

The Philippine Stock Exchange Index (PSEI) increased by 4.29 percent, closing the month at 5,107. The index hit a new historic high of 5,146 on March 19 with year-to-date average total daily values of more than USD 180 million. President Aquino has ordered a faster PPP rollout and the disbursement of more than half this year's budget. PHP 1.1 trillion has already been released with majority going to the health, transportation and agriculture departments.

The yields of peso government securities (GS) increased across the curve as the market sentiment reversed on rising oil prices due to tensions between Iran and the Eurozone. Despite the Bangko Sentral ng Pilipinas' decision to cut policy rates from 4.25 percent to 4 percent, bond investor sentiments were still weighed down by inflation concerns.

Headline inflation was at 2.6 percent, down from 2.7 percent in February. The Philippines recorded a budget deficit of PHP 197.8 billion in 2011, which is narrower than the PHP 300 billion deficit targeted earlier. With this, the Philippines stands closer to a credit rating upgrade from Standard & Poor's, which expects the country's debt profile to further improve as the economy grows and revenue collection increases.
