#### Fund Manager's Report

The Philippine Stock Exchange Index (PSEi) ended at 6,721.45 an increase of 15.63% YTD. This is a new high for the Index. The macro fundamentals remain intact. February Inflation was reported at 3.4% YoY slightly higher than expectation of 3.3%. This is most likely brought about by higher sin taxes imposed on alcohol and tobacco prices. Overseas worker remittances for the month of December was up 9.7%YoY beating consensus of 7.0%YoY. This is a good showing considering global uncertainties. Market rallied across sectors. The MSCI index rebalancing caused a rally additional weightings (BDO, FLI, DMC, and PNB) and a sell down of those with reduced weightings (AGI).

Local treasury notes echoed the positive macroeconomic fundamentals and rallied during February. Speculation on the closing of the BSP's Special Deposit Account (SDA) facility led to a bullish flattening of the yield curve, with yields falling by as much as 40bps for the 10-yr yields, and about 20bps at the longer end of the yield curve.
