INVESTMENT OBJECTIVE AND STRATEGY

The UnionBank Large Capitalization Philippine Equity Portfolio is a peso-denominated equity fund that uses a strategy that approximates the returns of the Philippine Stock Exchange Index (PSEi), while adding value through active stock selection. Its core investment components are large capitalization stocks listed in the PSE. Relative weights between PSEi stocks as well as opportunistic allocation into non-index issues (e.g. IPO's) may vary from time to time, depending on the investment manager's outlook on stock valuations. Research plays a central role in the development of stock valuation views of investment managers.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Large Capitalization Philippine Equity Portfolio is suitable only for investors who:
 - Are individuals of legal age and corporations with a long-term investment horizon
 - Have an aggressive risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

OUTLOOK AND STRATEGY

PSEi fell 2.9% month on month reversing October's recovery. The primary reasons for the dip was another disappointing corporate earnings results season, lower than consensus GDP and an artificial drop caused by the MSCI rebalancing. Corporate earnings grew by 1.25% for the third quarter which is behind market expectations of 3 to 4% EPS growth for the year. GDP data came in at 6%, which, while an improvement from the previous quarter still came behind projections of 6.3% growth. Foreign outflows saw an acceleration as well although the outflows can be linked more towards the rebalancing of MSCI rather than a generally bad sentiment to the Philippine market. In terms of overall equity outlook, we expect a recovery for the last month of 2015 due to window dressing activities. We see the index continuing to trade the 6800 to 7200 levels until the year-end.
