INVESTMENT OBJECTIVE AND STRATEGY

The UnionBank Large Capitalization Philippine Equity Portfolio is a peso-denominated equity fund that uses a strategy that approximates the returns of the Philippine Stock Exchange Index (PSEi), while adding value through active stock selection. Its core investment components are large capitalization stocks listed in the PSE. Relative weights between PSEi stocks as well as opportunistic allocation into non-index issues (e.g. IPO's) may vary from time to time, depending on the investment manager's outlook on stock valuations. Research plays a central role in the development of stock valuation views of investment managers.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Large Capitalization Philippine Equity Portfolio is suitable only for investors who:
 - Are individuals of legal age and corporations with a long-term investment horizon
 - Have an aggressive risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

OUTLOOK AND STRATEGY

For the first time since June, the market moved up MoM as it gained 0.88%, ending the roller coaster of a year on a slightly happier note. The year was marked with key events locally and globally with the rise of now President Duterte, President-elect Trump of the US, the much awaited rate hike, and the surprising Brexit. All these events occurred amidst a volatile market, most likely caused by said factors, which created a difficult trading environment for local equities. Investors of the PSEi saw yet another month of net foreign outflows, capping off the year with anemic trading volumes.

As fund managers look to 2017, the biggest catalysts we should be observant of 1) listed corporations' ability to meet or beat targets and 2) the capability of our local government and that of the US to either execute stated plans or to make certain policies clearer. The local market has lost its premium versus the 5 year average P/E and may be range bound without new catalysts. We have rotated our holdings and plan to remain nimble with the ability to deploy into or take profit on liquid names.
