**INVESTMENT OBJECTIVE AND STRATEGY**

The UnionBank Large Capitalization Philippine Equity Portfolio is a peso-denominated equity fund that uses a strategy that approximates the returns of the Philippine Stock Exchange Index (PSEi), while adding value through active stock selection. Its core investment components are large capitalization stocks listed in the PSE. Relative weights between PSEi stocks as well as opportunistic allocation into non-index issues (e.g. IPO's) may vary from time to time, depending on the investment manager's outlook on stock valuations. Research plays a central role in the development of stock valuation views of investment managers.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Large Capitalization Philippine Equity Portfolio is suitable only for investors who:
  - Are individuals of legal age and corporations with a long-term investment horizon
  - Have an aggressive risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

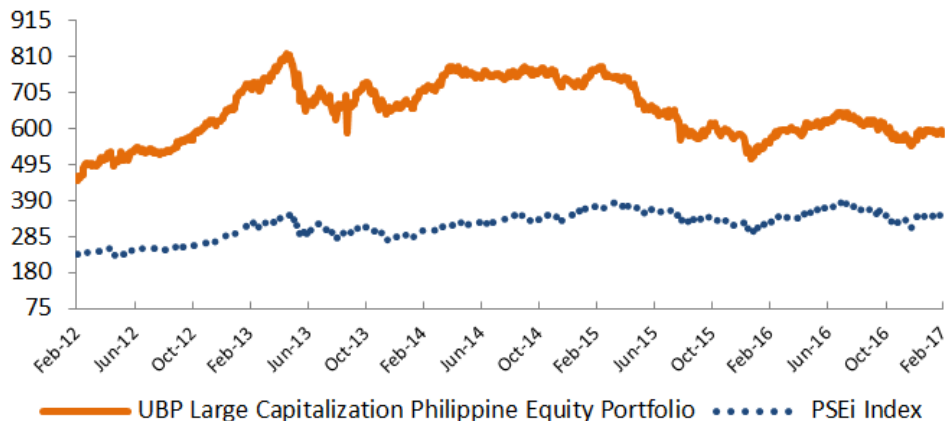

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

**RELATED PARTY TRANSACTIONS**

The fund has time deposits with City Savings Bank amounting to Php 49.29 Mn. This investment outlet was approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

**OUTLOOK AND STRATEGY**

The market range traded over the month and ended slightly lower at 7212, -0.2% compared to the prior month. Outflows once again brought the market lower with the YTD position at USD 97m outflow. With corporate earnings coming in line generally speaking, we may continue seeing the market move sideways as a whole and more swings on a per name basis. Names that disappoint in the earnings should expect investors to punish the stock such as Cemex that underperformed consensus targets. Those that surprise in either earnings like Globe and Meralco or for other reasons like Puregold's index inclusion serve as catalyst for some fund managers to ride the momentum before locking in gains.

Foreign flows continue to look like the biggest determinant of stock performance as passive funds and ETFs continue to drive the market's direction. We are still awaiting a catalyst such as the passage of the first tax reform package given that earnings are generally in-line. We have rotated our holdings and plan to remain nimble with the ability to deploy into or take profit on liquid names.
