**INVESTMENT OBJECTIVE AND STRATEGY**

The UnionBank Large Capitalization Philippine Equity Portfolio is a peso-denominated equity fund that uses a strategy that approximates the returns of the Philippine Stock Exchange Index (PSEi), while adding value through active stock selection. Its core investment components are large capitalization stocks listed in the PSE. Relative weights between PSEi stocks as well as opportunistic allocation into non-index issues (e.g. IPO's) may vary from time to time, depending on the investment manager's outlook on stock valuations. Research plays a central role in the development of stock valuation views of investment managers.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Large Capitalization Philippine Equity Portfolio is suitable only for investors who:
  - Are individuals of legal age and corporations with a long-term investment horizon
  - Have an aggressive risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

**PORTFOLIO COMPOSITION**

**OTHER DISCLOSURES**
**RELATED PARTY TRANSACTIONS**

The fund has equity investments with Aboitiz Power and time deposits with City Savings Bank and UnionBank of the Philippines amounting to Php 7.84 Mn, Php 41.29 Mn and Php 10.00 Mn. This investment outlet was approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

**OUTLOOK AND STRATEGY**

March saw the PSEi climb up 1.4% despite outflows and lack of significant catalysts outside of rebalancing flows. Indices such as the local index, FTSE, and S&P created trading opportunities for names such as PGOLD and CNPF that were added into their respective indices. Foreign outflows continued as US\$252 Mn exited the market, indicating that local buying propped up the market. The Philippines net foreign outflow position of US\$350 Mn is vastly different from our regional counterparts that have experienced YTD inflows.

Corporate earnings were generally in line for the month with only a few standout performances driving stocks upwards (ICT) or downwards (CHP). Investors are still closely watching the progress of the government's tax reform package. We have rotated our holdings and plan to remain nimble with the ability to deploy into or take profit on liquid names.
