INVESTMENT OBJECTIVE AND STRATEGY

The UnionBank Large Capitalization Philippine Equity Portfolio is a peso-denominated equity fund that uses a strategy that approximates the returns of the Philippine Stock Exchange Index (PSEi), while adding value through active stock selection. Its core investment components are large capitalization stocks listed in the PSE. Relative weights between PSEi stocks as well as opportunistic allocation into non-index issues (e.g. IPO's) may vary from time to time, depending on the investment manager's outlook on stock valuations. Research plays a central role in the development of stock valuation views of investment managers.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Large Capitalization Philippine Equity Portfolio is suitable only for investors who:
 - Are individuals of legal age and corporations with a long-term investment horizon
 - Have an aggressive risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

OUTLOOK AND STRATEGY

The market rallied for the third month in a row as it closed 2.3% higher with an intra-month breach of 8,000 before coming back down to 7,800 levels. Net inflows continued and finally brought up the net position back to a positive. Catalysts were mixed over the month given that 1) earnings were generally in-line with only a few notable beats and misses, 2) GDP was unspectacular, 3) President Duterte declared martial law in Mindanao, and Congress passed the first package of the government's tax reform program. Package 1 is most likely the biggest of all the said catalysts with many analysts have indicated this as the biggest driver to bring the market to above 8,000 levels.

We continue to monitor this development and have been rebalancing our portfolios to reflect our view on the situation. We are relatively close to being fully invested but we plan to remain nimble with the ability to deploy into or take profit on liquid names.
