### Fund Manager's Report

The Philippine Stock Market again surged to record levels on the back of bullish sentiments caused by a surprise S&P credit rating upgrade, SDA cut and quantitative easing measures from abroad.

The PSE index climbed to a new record high of 7,213.46. The surge in the index was driven still by a sectoral rally composed of consumer, banking, property and conglomerate stocks.

Standard & Poor's upgraded the country's sovereign credit rating to BBB- from BB+ with a stable outlook mainly citing the country's improving external profile, decreasing reliance on foreign currency-denominated debt, and manageable inflation, as reasons for the upgrade. This is the second investment-grade rating the country received after Fitch Ratings in March gave it a BBB- with a stable outlook.
