Fund Manager's Report

After a steep rally in January, market yields corrected across liquid tenors mostly above the 10 year. Yields tracked US treasury movements as data coming out from the US strengthened the view of an earlier- than-expected rate hike. Meanwhile, Fuel and diesel price hikes sent jitters regarding inflation and further fueled a steep correction. With low liquidity ahead of the Chinese New Year, market players remained defensive. Month-on-Month, yields were by around 50bps from the 10 year liquid bonds to the long end of the curve.

On the second meeting of the Monetary Board this year, the BSP kept rates unchanged with RRP still at 4%, Special Deposit Account at 2.5% and Reserve Requirement at 20% citing inflation expectations remain firmly anchored and robust domestic growth continue to be firm. Amidst, central banks in the region cutting key rates, BSP held rates steady and remained positive that the Philippines' growth dynamics are supported by buoyant private demand. BSP further cuts inflation forecast this year and the next to 2.3% and 2.5% respectively (from 3% and 2.6%) due to lower oil prices and stronger peso.
