**INVESTMENT OBJECTIVE AND STRATEGY**

The UnionBank Peso Short Term Fixed Income Portfolio is a peso-denominated money market fund designed to provide investors a higher-yielding liquid outlet for their short-term transactional funds. It seeks capital preservation with enhanced yields.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Peso Short Term Fixed Income Portfolio is suitable only for investors who:
  - Are individuals of legal age and corporations with a medium to long-term investment horizon
  - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

**OTHER DISCLOSURES**
**RELATED PARTY TRANSACTIONS**

The fund has time deposits with City Savings Bank amounting to Php 93.03 Mn. This investment outlet was approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

**OUTLOOK AND STRATEGY**

Philippine GDP printed slightly lower than expected at 5.6% vs. 5.7% consensus estimates despite stronger government spending in June. An increase in consumption and investment offset a slowdown in exports.

Bangko Sentral ng Pilipinas kept its overnight borrowing rate on hold at 4% in its meeting last August 13. The decision was widely expected as policy makers remain comfortably on hold noting that inflation will likely be below the target range for 2015. The central bank's reaction towards development in the global front is said to remain consistent with their macro prudential measures.

Yields for the local bonds were lower for the month of August. With the sub 1% inflation and the yields tracking US treasuries, local bond players continued to be comfortable at near the highs for the year with 10 year yields reaching 3.5% levels and the long end of the curve reaching below 4%. Market players also remained biddish for the month as they await details of Bureau of Treasury's debt swap to be exchanged first week of September.
