**INVESTMENT OBJECTIVE AND STRATEGY**

The UnionBank Peso Short Term Fixed Income Portfolio is a peso-denominated money market fund designed to provide investors a higher-yielding liquid outlet for their short-term transactional funds. It seeks capital preservation with enhanced yields.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Peso Short Term Fixed Income Portfolio is suitable only for investors who:
  - Are individuals of legal age and corporations with a medium to long-term investment horizon
  - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

**OUTLOOK AND STRATEGY**

Philippines central bank remained its overnight borrowing rate unchanged at 4 percent for the ninth consecutive time on November 12th, as widely expected. Philippines annual inflation rate was at 0.4 percent in October of 2015, the same pace as in the previous month and below market expectations. The Philippines economy grew an annual 6.0 percent in the September quarter of 2015, accelerating from an upwardly revised 5.8 percent expansion in the previous three months but weaker than market consensus. A faster increase in household and government spending and exports offset a slowdown in investment.

The local bond market continued to take a break from trading as volume remained thin. The street was very quiet as players remained sidelined and were very watchful of their marks due to the month-end. We can expect more of sideways trading from the local bond market. We expect market activity to pick up come December as we approach the Fed's decision on policy rates. We also continue to look abroad at economic data for better guidance.
