**INVESTMENT OBJECTIVE AND STRATEGY**

The UnionBank Peso Short Term Fixed Income Portfolio is a peso-denominated money market fund designed to provide investors a higher-yielding liquid outlet for their short-term transactional funds. It seeks capital preservation with enhanced yields.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Peso Short Term Fixed Income Portfolio is suitable only for investors who:
  - Are individuals of legal age and corporations with a short-term investment horizon
  - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

- ❖ **THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)**
- ❖ **RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY**
- ❖ **WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT**

<b>Highest</b>	134.190199
<b>Lowest</b>	132.717910

**Statistics**

<b>Weighted Ave. Duration</b>	0.5136
<b>Volatility, Past 1 Year*</b>	0.92%
<b>Shape Ratio**</b>	-0.22
<b>Information Ratio***</b>	-0.04

\*Volatility measures the degree to which the Fund fluctuates vis-a-vis its average return over a period of time.

\*\*Sharpe Ratio is used to characterize how well the return of Fund compensates the investor for the level of risk taken. The higher the number, the better. (Risk Free Rate = 1.000%)

\*\*\*Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

**OTHER DISCLOSURES**

**RELATED PARTY TRANSACTIONS**

The fund has time deposits with City Savings Bank and UnionBank of the Philippines amounting to Php 26.07 Mn and Php 8.00 Mn respectively. These investment outlets were approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

**OUTLOOK AND STRATEGY**

The Bureau of Treasury closed the offer period for the new 3-year RTB earlier than initially announced. The offer was capped at PHP 175 billion as demand from investors was well-received. On the other hand, demand for the newly issued 7 year FXTN (07-59) was timid. The 7 year was allocated PHP 6B out of the PHP 15B that was offered and the coupon was awarded at 4.5%.

Meanwhile, BSP kept its policy tools unchanged as expected. The interest rate corridor (IRC) was also kept unchanged at 2.50%, 3.00%, and 3.50%. March inflation of 3.4% was slightly higher than February's 3.3% and is still within BSP March inflation forecast of 3% to 3.8%. BSP's inflation expectations remain to average at 3.3% in 2018 and 3.4% for 2017.

In contrast to movements in US bond market space, Yields were higher in the local bond market driven by persistent inflationary pressures and a tighter environment for the month of April. Liquidity was tight due to the settlement of the successful RTB issuance and the income tax season as evidenced by undersubscribed 28- day TDF auctions. Most market players unwound positions from the belly to the long end part of the curve in exchange for Treasury Bills and the short end. We continue to see demand for Treasury Bills and the newly issued RTB 03-08 as investors remain cautious and defensive in the near term.
