**INVESTMENT OBJECTIVE AND STRATEGY**

The UnionBank Long Term Fixed Income Portfolio is a peso-denominated bond fund that seeks total return by investing in a diversified portfolio of primarily investment-grade fixed-income instruments.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The UnionBank Long Term Fixed Income Portfolio is suitable only for investors who:
  - Are individuals of legal age and corporations with a medium to long-term investment horizon
  - Have a moderately conservative risk profile
- The principal is at risk. Loss in the original investment may arise due to market fluctuations and price volatility of the securities held by the fund.

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are comfortable with the accompanying risks.

Some of the key risks associated with this Fund are listed below:

- **Interest Rate Risk:** This is the possibility to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk:** This is the possibility to experience losses due to adverse changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk:** This is the possibility to experience losses due to the fund's inability to sell and convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.
- **Credit/Default Risk:** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

The Fund invests in quality assets which are evaluated under the Trust Department's accreditation process and BSP regulations. Internal risk limits, together with regulatory exposure limits, are monitored, reviewed and strictly adhered to on a daily basis.

**Portfolio Composition**

**OTHER DISCLOSURES**

**RELATED PARTY TRANSACTIONS**

The fund has bond investments with Aboitiz Equity Ventures and time deposits with City Savings Bank amounting to Php 3.31 Mn and Php 2.98 Mn, respectively. These investment outlets were approved by the Trust Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

**OUTLOOK AND STRATEGY**

Surprising results from the United Kingdom referendum made "Brexit" a reality as it heightened uncertainty across the financial markets. Initial post-referendum market painted a risk-averse scenario as bid offers remained wide. However, the bond market jump started its steep rally in anticipation of more stimulus from central banks. The local bond yield curve bull flattened as the long end of the curve rallied in as much as 35 basis points and the belly rallied almost 30 basis points as well. The rally was sustained as bets for a July hike and even a hike for the rest of the year were scrapped off the table. Short end of the curve remained at their current level due to Overnight Deposit Facility's 2.5% floor. We expect July to be a month of yield hunting while headline driven events may throw in more uncertainties in global developments.
