OUTLOOK AND STRATEGY

The PSEi started 2016 by continuing the downward trend that ended 2015, closing at 6,687 by month end. The market was battered as concerns on China's numbers continued to weigh on the global markets in addition to the triggering of their stock market circuit breakers, which we believe has prevented true price discovery and accentuated selling pressure in their market. The market will focus on the tone set by the Fed and the start of corporate earnings season as catalysts for the market. Our strategy remains focused on staying nimble by being overweight on cash and concentrating on more liquid names.
