**OUTLOOK AND STRATEGY**

Philippine equities continued its descent, down another 1.9% to close the month at 7,140. Almost the entire month registered foreign outflows with general volumes in the market being the lowest since September 2011. September inflation accelerated to 6.7% from 6.4% in the month prior with food prices being the main culprit. Macro forecasts have been adjusted given the shifting economic landscape. Inflation target ranges rose from 4-4.5% to 4.8-5.2% for 2018 and 2-4% to 3-4% for 2019. The GDP estimate has also been lowered from 7-8% to 6.5-6.9% for 2018. The government will need to observe rice and oil prices and act accordingly with policies addressing these inflation drivers.

3Q Earnings started coming out late in October and were generally in line. Property names, banks and a few conglomerates suffered from foreign outflows. Consumer movements were mixed but the negative effect of inflation will likely impact margins across the board to varying degrees. The majority of companies will report in November with market players watching for strong beats to offset macro concerns.
